

*Introducing an
entirely new medium for
the Rockwork artisan...*

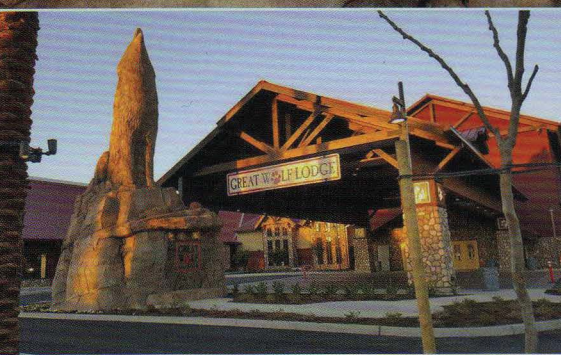

Carve-Right™

Carve-Right™ is an all new, revolutionary product developed by professional rock work artisans.

Carve-Right™ enables the artisan working in sculptural concrete to produce textures and formations that simply cannot be done with any conventional cement mix.

Carve-Right™ aids uniquely in the creation of realistic permanent simulated environments for the scenic and exhibitory construction professional.

Carve-Right™ technical specifications please see reverse side.

amount of
stickiness!"*

Carve-Right™

Carve-Right™ is an exclusive proprietary formula of a pre-bagged Portland cement-based composition.

Carve-Right™ is designed as a permanent finishing cement for simulating elements of natural environments where the surface is formed and finished by sculptural methods, such as shaping, stippling, brushing, embossing and carving.

Carve-Right™ can easily be mixed for any desired consistency and used for both vertical and horizontal applications with confidence.

Carve-Right™ Features & Benefits

- Excellent formability
- Blends seamlessly
- Allows for controlled sharp surface texture
- Superior retention of finishing and texturing abilities
- Ability to retain surface texture unchanged after completion of finishing operations
- Simplifies the process of surface finishing and applying texture
- Enables better uniformity of appearance
- Provides for better durability

Carve-Right™ Performance Specifications

- ASTM C-109 strength exceeds 3200 after 28 days
- Board life 60 mins 120 after placed at typical ambient temperature range of 60°F/15°C to 90°F/33°C
- Consistency - flowable when tested per ASTM C109
- Efflorescence greatly reduced
- Ability to be placed by hand or pneumatic methods
- Formulated for pneumatic placement on vertical or horizontal areas
- Consistent ultimate strength
- Improved strength performance over time
- Special blends upon request, call for more information
