Both Motors
Operate on
Standard 110VAC

Completely Variable
Flow of Chips

Smooth Walled
Flexible Tubing for
Good Flow

Minimum Chip
Breakage Over Hand
Application

15+ gal Material
Hopper Capacity

The Quikspray Commercial Chip Sprayer™ features a 2-speed 2-3HP blower with 150/196 cfm of air with a velocity up to 33,570 fpm. The transfer and metering of the chip is accomplished with a positive, but variable speed auger feed powered by a separate gear reduced motor. The fast application of chips into wet resin eliminates a stop and go procedure. Both motors operate on 110VAC.
